

Pop Quiz.
Get out a scrap sheet of paper.

- 1. What is the definition of congruent triangles?**
- 2. What is the SSS Postulate?**
- 3. How might the reflexive property be useful in proving two triangles congruent?**

Bellwork

10/18/2011

1. Given: \overline{DF} bisects \overline{CE} , $\overline{DC} \cong \overline{DE}$
Prove: $\triangle CDF \cong \triangle EDF$

- | | |
|---|-------------------------------|
| 1. \overline{DF} bisects \overline{CE}
$\overline{DC} \cong \overline{DE}$ | 1. Given |
| 2. $\overline{CF} \cong \overline{EF}$ | 2. Def. of a segment bisector |
| 3. $\overline{DF} \cong \overline{DF}$ | 3. Reflexive Property |
| 4. $\triangle CDF \cong \triangle EDF$ | 4. SSS Postulate |

Geometry

4.4 Prove Triangles Congruent by SAS and HL

Standard(s): 3,7

Vocabulary:

1. **Legs of a Right Triangle:** The sides adjacent to the right angle.

2. **Hypotenuse:** The side opposite the right angle.

POSTULATE

For Your Notebook

POSTULATE 20 Side-Angle-Side (SAS) Congruence Postulate

If two sides and the included angle of one triangle are congruent to two sides and the included angle of a second triangle, then the two triangles are congruent.

If Side $\overline{RS} \cong \overline{UV}$,
 Angle $\angle R \cong \angle U$, and
 Side $\overline{RT} \cong \overline{UW}$,
 then $\triangle RST \cong \triangle UVW$.

THEOREM

For Your Notebook

THEOREM 4.5 Hypotenuse-Leg (HL) Congruence Theorem

If the hypotenuse and a leg of a right triangle are congruent to the hypotenuse and a leg of a second right triangle, then the two triangles are congruent.

Proofs: Ex. 37, p. 439; p. 932

How to Prove Δ 's \cong :

1. Def. of $\cong \Delta$'s
2. SSS Postulate
3. SAS Postulate
4. HL Theorem

Naming Included Angles

Use the diagram to name the included angle between the given pair of sides.

\overline{GH} & \overline{HI} $\angle GHI$

\overline{HI} & \overline{IG} $\angle HIG$

\overline{IG} & \overline{HG} $\angle IGH$

\overline{GI} & \overline{IJ} $\angle GIJ$

Applying HL or SAS

Decide whether enough information is given to prove that triangles are congruent using SAS or HL.

Missing Congruence for Congruent Δ 's

State the third congruence that must be given to prove that $\triangle ABC \cong \triangle DEF$ using the indicated postulate or theorem.

Given: $\angle B \cong \angle E$, $\overline{BC} \cong \overline{EF}$, $\underline{\overline{BA}} \cong \underline{\overline{ED}}$ (SAS)

Given: $\overline{AB} \cong \overline{DE}$, $\overline{BC} \cong \overline{EF}$, $\underline{\overline{CA}} \cong \underline{\overline{FD}}$ (SSS)

Given: $\overline{AC} \cong \overline{DF}$, $\angle A$ is a right angle and $\angle A \cong \angle D$,
 $\underline{\overline{BC}} \cong \underline{\overline{EF}}$ (HL)

Use the SAS Congruence Postulate

Given: $\overline{MP} \cong \overline{NP}$, \overrightarrow{OP} bisects $\angle MPN$
 Prove: $\triangle MOP \cong \triangle NOP$

1. $\overline{MP} \cong \overline{NP}$,
 \overrightarrow{OP} bisects $\angle MPN$

2. $\angle MPO \cong \angle NPO$

3. $\overline{OP} \cong \overline{OP}$

4. $\triangle MOP \cong \triangle NOP$

1. Given

2. Def. of \angle bisector

3. Reflexive Prop.

4. SAS Post.

Use the HL Congruence Theorem

Given: $\overline{YW} \perp \overline{XZ}$, $\overline{XY} \cong \overline{ZY}$

Prove: $\triangle XYW \cong \triangle ZYW$

1. $YW \perp XZ$, $XY \cong ZY$

1. Given

2. $\angle YWZ$ is a right \angle
 $\angle YWX$ is a right \angle

2. Def. of \perp lines

3. $YW \cong YW$

3. Reflexive Property

4. $\triangle XYW \cong \triangle ZYW$

4. HL Theorem
